Lumnia Optix

Future proof your fly control today,
don't replace it

Lumnia Optix is a **24/7 AI-powered early warning system — a complete solution driven by smart tech and expert insight.** We transform your existing insect light traps with PestConnect Optix cameras. Then, our expert technicians partner with you to establish custom risk thresholds, ensuring you proactively prevent costly infestations before they even begin. All this without the hassle or expense of replacing your current Lumnia Standard, Compact or Ultimate units.

How Lumnia Optix works

PestConnect Optix camera is fitted onto the Lumnia unit, and an alert threshold is aged upon

AI analyses captured images, assessing insect count and glueboard coverage

If activity exceeds the threshold, our experts are automatically alerted to review the image

Here’s how you can benefit from Lumnia Optix without having to replace your insect light trap

- Proactive prevention of fly infestations
- More protection, less risk and costs of control measures as a result of infestation
- Continuous peace of mind
- Always-on protection means you’re always ready for audits
- HACCP certified for adherence to a globally recognised food safety management system

Why Lumnia Optix is the smart choice:	Lumnia Optix	Competitor solutions
Retrofittable technology: no cost and hassle of ILT replacement	✓	✗
AI-enabled remote real-time monitoring	✓	✓
Threshold-based alerts based on state of glueboard	✓	✓
Custom-engineered technology and ILTs for performance you can trust	✓	✗
More than a trap: Full integration into a powerful digital ecosystem	✓	✗
Total pest management: technology delivered with expert service	✓	✗
Optimal ILT energy savings of up to 79%	✓	✗
HACCP certified	✓	✗

Upgrade your Lumnia today for fly control that’s always on watch so you don’t have to be.
