The Experts in Pest Control

The Laryngeal Mask Company (M) Sdn. Bhd.

Effective Proofing With Flexi Armour Range

The Laryngeal Mask Company (Malaysia) Sdn. Bhd. is a wholly owned subsidiary of Teleflex, a global provider of medical technologies designed to improve the health and quality of people's lives. They develop and manufacture medical equipment used in critical care and surgery.

Understanding the need

Realising the vision to become an innovative, highly trusted global provider of clinically relevant medical devices, The Laryngeal Mask Company (M) Sdn Bhd are proactive and committed in adhering to the highest standards of compliance and quality to ensure uncompromised medical supply management.

One of the main manufacturing plants is located in Kulim Hi-Tech Park, the first high technology park in Malaysia comprising industrial, institutional, residential and amenities zones forming a uniquely intertwined ecosystem. Due to the surrounding green landscape, they occasionally encounter animal intrusions such as snakes in their warehouse which raises safety concerns among the employees.

Meeting the challenge

While The Laryngeal Mask Company has the complete pest risk management in place, Assistant Facilities Manager, Encik Zulhusni Saad recognises the importance of proactive risk management for such incidents. As a trusted partner in pest control, Rentokil approached Encik Zulhusni Saad with an alternative innovation, the **Rentokil Flexi Armour Dock** proofing solution.

Rentokil Flexi Armour Dock is a highly effective proofing solution to eliminate gaps around dock levellers – which are a major entry point for pests such as rodents, providing an impenetrable barrier into the facility. Although the solution's main pest target is rodents, the Flexi Armour Dock uses a combination of Kevlar and knitted steel mesh that are flexible enough to deal with the variations in dock leveller size and frequency of movement whilst remaining impenetrable to pest intrusions.

The installation of the **Rentokil Flexi Armour Dock** managed to solve the animal intrusion issues for The Laryngeal Mask Company with no major alteration to the building structure. Encik Zulhusni Saad also commented on the quality of the Flexi Armour material which does not impact on the docking equipment functionality and most importantly, the employee's well-being and safety are protected.

Teleflex®

“Excellent solution with long lasting material and it adhered to our industry safety regulations.”
