

YODmilk Shop

Rentokil Lumnia LED Fly Trap

YODmilk Shop is a beloved, locally-owned gem where many gather to kickstart their mornings. They offer an impressive variety of artisan bagels and creative fillings, prioritising quality and customer experience above all else.

Understanding the Need

Before partnering with Rentokil Initial, YODmilk Shop faced the challenge of managing recurring fly activity that tended to peak during their busiest service hours. For a business built on premium food quality, these pests were more than just a nuisance—they were a threat to stringent hygiene standards and customer comfort. The team at YODmilk recognised that to maintain a food-safe environment, they needed a solution that could eliminate pests without disrupting the aesthetic and charm of their cafe.

Meeting the Challenge

To address these concerns, YODmilk Shop engaged Rentokil to implement the Lumnia LED insect light trap—a solution that seamlessly bridges the gap between effective fly control and discreet design. Following the installation, the partnership achieved two key outcomes:

1. **Aesthetic integration:** The Lumnia unit provides a clean, modern, and professional look that blends effortlessly into the front-of-house decor, avoiding the industrial appearance of traditional traps.
2. **Proven results:** Since the installation, YODmilk has reported a significant reduction in fly activity throughout the premises, leading to a noticeably cleaner and more comfortable environment for both staff and customers.

Beyond the technology, YODmilk highlighted Rentokil's **timeliness, clear communication, and thorough service quality** as the cornerstones of their satisfaction. This partnership has empowered YODmilk Shop to focus on what they do best, with the confidence that their hygiene standards are being upheld by a reliable, professional team.

“Since engaging Rentokil’s services, we’ve noticed a significant improvement in fly control, with much lower pest activity in both the kitchen and front-of-house areas. The environment feels cleaner and more comfortable for customers and staff, and it has helped us maintain stronger hygiene standards overall.”
