The Experts in Pest Control

## **Orion Food Industries (M) Sdn. Bhd.**

### **Effective Pest Control With Fumigation**

Orion Food Industries (M) Sdn. Bhd. established in 2007 is a dynamic and forward-thinking premium food coating supplier. A member of the Savoures Group, a renowned platform for specialty food ingredients and food solutions.

### Understanding the need

Orion Food Industries (M) Sdn. Bhd., one of the leading food processing companies, is driven by a vision to deliver innovative and high-quality food products globally. Committed to upholding the highest standards of food safety and hygiene, they recognise the importance of effective and sustainable solutions in their facilities.

### Meeting the challenge

Orion Food Industries (M) Sdn. Bhd. has continuously demonstrated a proactive approach by actively seeking sustainable and effective alternative treatments for its facilities. This was a challenge along with their premises having a complex structure with goods and types of machinery.

“Meetings were held with detailed explanations about the fumigation process and we are thankful for the meeting arrangement.”

In line with their commitment to reducing carbon footprint and ensuring the safety of their food products, Orion Food Industries partnered with Rentokil Initial Malaysia for the first Rentokil Space Fumigation service at their entire factory. Unlike earlier fumigation procedures that they have experienced. This fumigation uses Hydrogen Cyanide, which is used for structural fumigation and has a minimal environmental impact when compared to other fumigation chemicals such as Sulfuryl Fluoride (greenhouse effect) or Methyl Bromide (ozone depletion). Rentokil is committed to solidifying the partnership's dedication by implementing environmentally responsible solutions for its operations.

Throughout the process, Rentokil ensures that safety protocols, communication, documentation, and preparation are met for Orion Food Industries. Rentokil thoroughly checked every stage of the preparation and facility readiness before commencing the fumigation treatment. Furthermore, tracking and documentation were conducted at every aspect of the process; ensuring complete transparency and accountability. Orion Food Industries was satisfied because the fumigation process was a success - that came with complete detailed treatment reports to support Orion's commitments and audit requirements.
