

Rentokil

PestConnect

Setting a new standard
for pest control

How it works

1

PestConnect solutions actively detect, capture or kill a variety of pests, with innovative, humane and highly effective traps

2

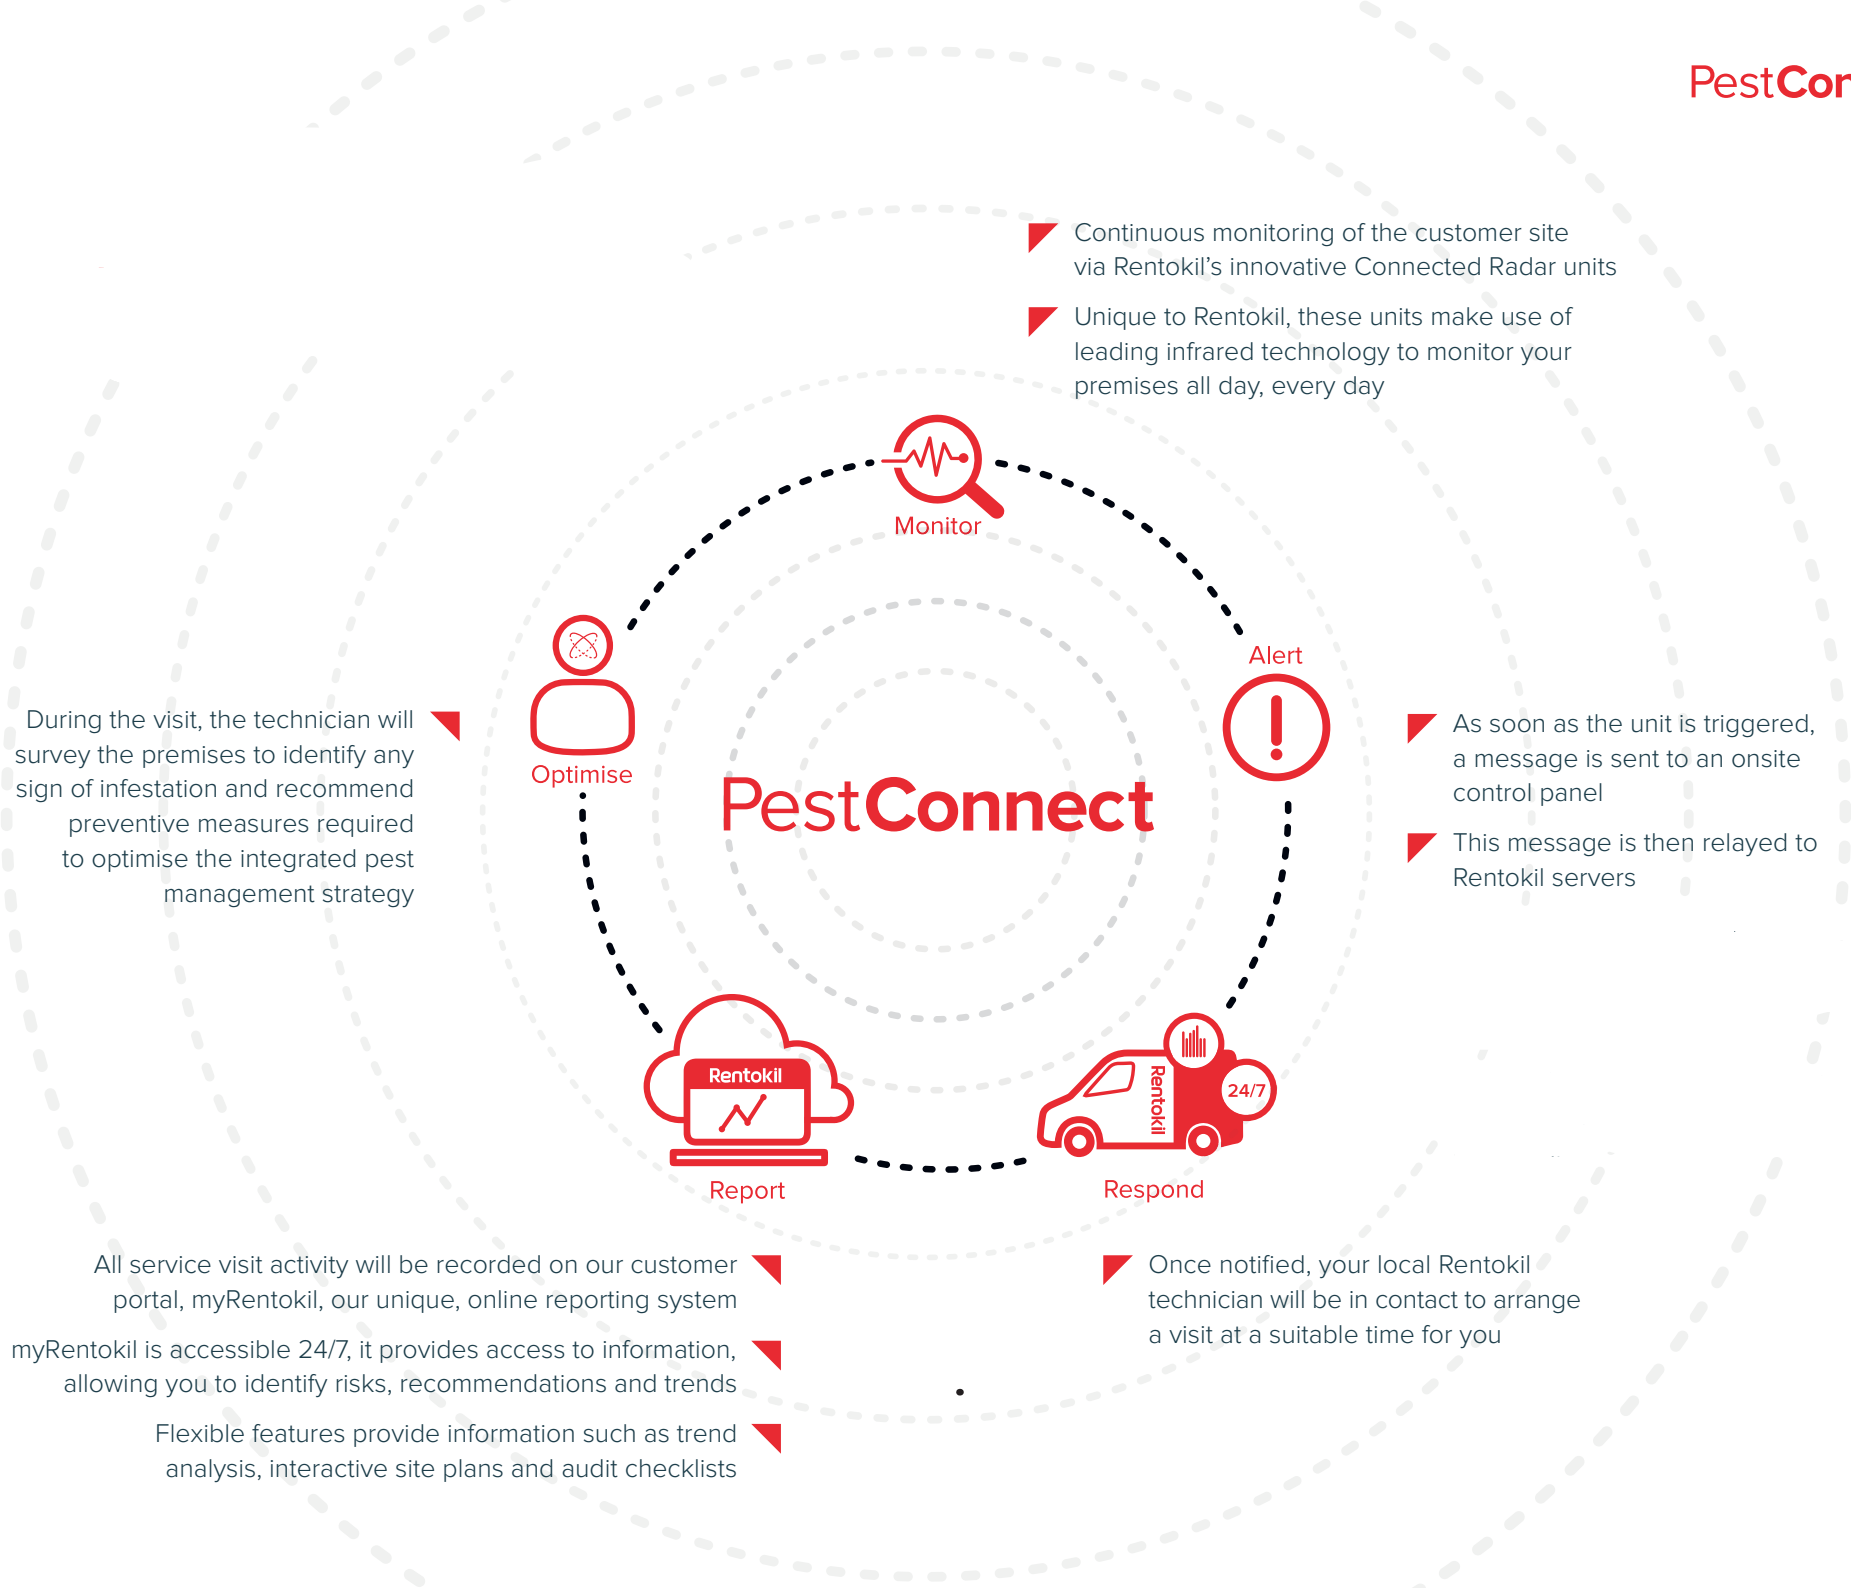

These units feature integrated sensor technology that keeps watch over your premises all day, every day. If a pest is detected or the trap activated, it will trigger an alert to Rentokil for a rapid response.

3

Using wireless technology, the system works completely independently and discretely. This avoids any interruption to your business network or machinery.

- ▶ Continuous monitoring of the customer site via Rentokil's innovative Connected Radar units
- ▶ Unique to Rentokil, these units make use of leading infrared technology to monitor your premises all day, every day

- ▶ As soon as the unit is triggered, a message is sent to an onsite control panel
- ▶ This message is then relayed to Rentokil servers

- ▶ Once notified, your local Rentokil technician will be in contact to arrange a visit at a suitable time for you

During the visit, the technician will survey the premises to identify any sign of infestation and recommend preventive measures required to optimise the integrated pest management strategy

- ▶ All service visit activity will be recorded on our customer portal, myRentokil, our unique, online reporting system
- ▶ myRentokil is accessible 24/7, it provides access to information, allowing you to identify risks, recommendations and trends
- ▶ Flexible features provide information such as trend analysis, interactive site plans and audit checklists

PestConnect

PestConnect, provides in-depth information on all pest activity with trend reporting, interactive maps, charts and analytical tools.

Continuous 24/7, 365 days per year protection
enhanced monitoring against pests

Effective & immediate treatment to control
& minimise business impact

Fast response from skilled technician who
will identify source of infestation
& any further action

Together with the monitoring and in-depth reporting power of PestConnect, our team can provide constant improvements and comprehensive recommendations to enhance your protection from pest contamination.

Technology-enabled solutions for your peace of mind

RADAR Connect

The range of PestConnect products, such as RADAR, can be used as part of an effective integrated pest management (IPM) solution for mice, to enable enhanced monitoring and protection, ensuring you are always in control of any pest concerns. Using our effective, humane mouse trap RADAR, the Rentokil Connect technology allows immediate capture and containment, all whilst monitoring and reporting mice activity

Benefits of Connect mouse control

- Continuous 24/7, 365 days per year protection against mice intrusion, minimising risk
- Effective & immediate treatment. Captures, humanely kills and hygienically contains mice, reducing any risk of contamination
- In-depth reporting with easy-to-access data
- Highly reliable self monitoring system that provides advance warning of any issues such as low battery life - which could cause unexpected data loss
- Improved audit compliance with trends and analysis made available on myRentokil, providing additional assurance to third party auditors

myRentokil customer portal

Features and benefits of myRentokil

24/7 information access across a range of smart devices, anytime anywhere

Pest prevention recommendations - with priority status updates allowing you to focus on key concerns

Intuitive user interface for ease of use

Multi-site capabilities supported by site maps - allowing you to drill down to the level of detail required

Trend analysis of pest activity - including reports to support legislative reporting and auditing requirements for potential risks to be anticipated and preventative measures to be taken

Customised user reporting with the ability to schedule reports as required

Document download facility for relevant documentation to be securely downloaded when required

Individually tailored to your industry and your precise business needs, our solutions detect, capture or kill pests and alert a rapid response.

Rentokil is the global expert in pest control.

As the market leader we have a deep understanding of the risks a potential pest problem can create. We understand that protecting the health of your employees and customers also protects your reputation.

Tailored solutions

Our team of experts will look to understand your business and facility to ensure your PestConnect solution is customised to your needs.

With over 90 years of experience, we are trusted by people and businesses that value the high levels of expertise, protection and reassurance our services provide.

Why Rentokil?

Rentokil is the global leader in pest control, bringing expert, reliable and professional service to commercial and residential customers in over 60 countries worldwide. As the experts in pest control, we work closely with you to:

Give you peace of mind

With over 12,000 qualified technicians worldwide, we have extensive experience across a wide range of industry sectors. Our experts work proactively in partnership with you to minimise the threat of pest infestations in your business.

Safeguard your reputation

We take a dual approach, incorporating both preventative and responsive strategies to enhance protection for your business through a consistent, continuous pest control programme.
