

MMC Gamuda has been delivering large-scale projects with innovative engineering solutions and timeliness, which has solidified their position as a leading global infrastructure company. As developments were steadily

ongoing for their latest project, the MRT Putrajaya Line, the need for expert bird control arose to protect the integrity of our stations and also to keep birds safe. Rentokil Initial had the opportunity to partner with MMC Gamuda by providing effective bird proofing solutions to meet their needs. Mr Phang, Project Manager and Ms Fion, Design Manager from MMC Gamuda share their experience.

How has your overall experience been when engaging with Rentokil Initial?

Rentokil has been very professional and cooperative throughout the entire project. Currently, the work is still ongoing and each station has its own set of challenges and conditions. Hence, each site requires its own unique solution. Furthermore, the commitment Rentokil has shown in meeting our timelines and supporting our requests has been amazing. Rentokil has continuously strived to overcome issues for each unique site requirement even with work obstructions.

Did our services help your company to adhere to industry safety regulations?

Yes. As you can imagine, infrastructure and construction can be extremely challenging and requires strict safety requirements. Rentokil has always adhered to all safety procedures to ensure no violations ever occurred. Furthermore, we are reassured as Rentokil has their own stringent compliances on SHE policies.

What were the key highlights you've found to have a positive impact on your company when partnering with Rentokil Initial?

Rentokil's staff has been very polite and helpful throughout the entire project thus far. We appreciate how cooperative and complying they have been when it comes to our requirements and also requests. We're happy to be working with Rentokil Initial for this project.
